

I am paying for a service that the FCC shouldnt have any say in. I f the company can give me the service that I want then there isnt a problem. I dont pay radio stations to give me weather or news or commercials, I do pay XM to not play commercials, but if i want to listen to news or traffic reports it is good to know that i have that access if it is needed. So I strongly urge you to reject 04-160. Thanks you.
